SPEAKER UNIT

INTERNAL
MICROPHONE

3.5 WATTS power in internal and external speakers.
Harmonic distortion (THD) less than 1%.

High gain internal microphone (goose neck) that allows you to speak at a distance of 10 cm.
RJ9 connector for optional use with headset.

Sound alarm for emergency.
Possibility of connection with digital audio recording system (D.A.R.).

Designed for mounting of external speaker in glass without perforation and internal unit of desktop.
External and internal volume control.

Digital processor for intelligent audio control giving a frequency response for voice intelligibility.
Mute function.

Includes aluminum cable gland (30 cms).
Sensitivity calibration of the internal microphone in 3 phases.

Automatic shut down function (after 30 seconds of idleness, the intercom automatically lowers the volume by avoiding external noise).

Manual function for more privacy, allowing communication by pressing the PTT (mute) function.

Designed for areas with low ambient noise, such as offices, projecting an excellent corporate image thanks to its elegant presentation with aluminum and steel finishes.
Easy to install as it does not require drilling in the glass.

Advertising Messages Call History

Public Service Intercoms

Audio System for Companies

Conversations Digital Recorder

It has the ability to receive, process and record conversations with high-quality audio on a solid-state hard drive.

Simultaneous recording of 4 audio channels (1 week per channel).

Includes software to remotely access the DAR's solid-state hard drive so you can listen to audio recordings and download a copy of the local recording

1VOX-4U lets you select, program & reproduce direct loud speaking messages, pre-recorded messages, music, advertising messages or other audio playback up to 99 scalable communication areas & large predetermined distances through IP addresses & wirelessly, allowing access from any authorized administrative area & for any size of business.

Glass Intercom for offices

Perfect communication between the person and the internal microphone, allowing, allowing talk at a distance of 10-15 centimeters from the microphone. Ideal intercom for banks, other financial institutions & customer service points within an office.

PAGING SYSTEM

Intercom with elegant design for window installation

The LTG Intercom is designed especially for busy environments, high traffic of people, where security conditions and noise hinder communication and customer service effectively.

DUAL-VOX LTH Intercom

An attention to the public intercom for use with headset that allows uninterrupted communication comfortably and is completely hands-free.

VPR is a digital player of advertising messages on systems or telephone lines

Intercom with elegant design for window installation

Intercom for glass mounting in high traffic environments, where the security and noise conditions makes difficult the communication. Given its sleek design, it allows you use it while keeping your workspace free.

ADVANTAGES

Audio quality and power (3 internal Watts and 5 External watts) to places of high ambient noise

- Perfect communication between the user and the internal microphone, allowing, allowing talk at a distance of 10-15 centimeters from the microphone. Thereby ensuring the proper hygiene conditions for the microphone and reducing exposures to diseases.
- Anti-vandalism - Made of aluminum and steel, electrical wiring protected users and audible alarm.
- audible alarm for emergency
- Possibility of connection to the system of Digital Audio Recording (D.A.R).
- Keeps the workspace free, because the installation is done in the glass.
- Designed for mounting with or without drilling glass.
- optional measures gooseneck microphone according to the user's location
- Internal and External volume control.
- intelligent digital processor for audio control.
- Internal goose neck microphone.
- Harmonic distortion (THD) of less than 1%.
- Frequency response for speech intelligibility.
- Smart technology that enhances the sound of the voice.
- "Mute" function.
- Includes pasacable aluminum tube (30cm).

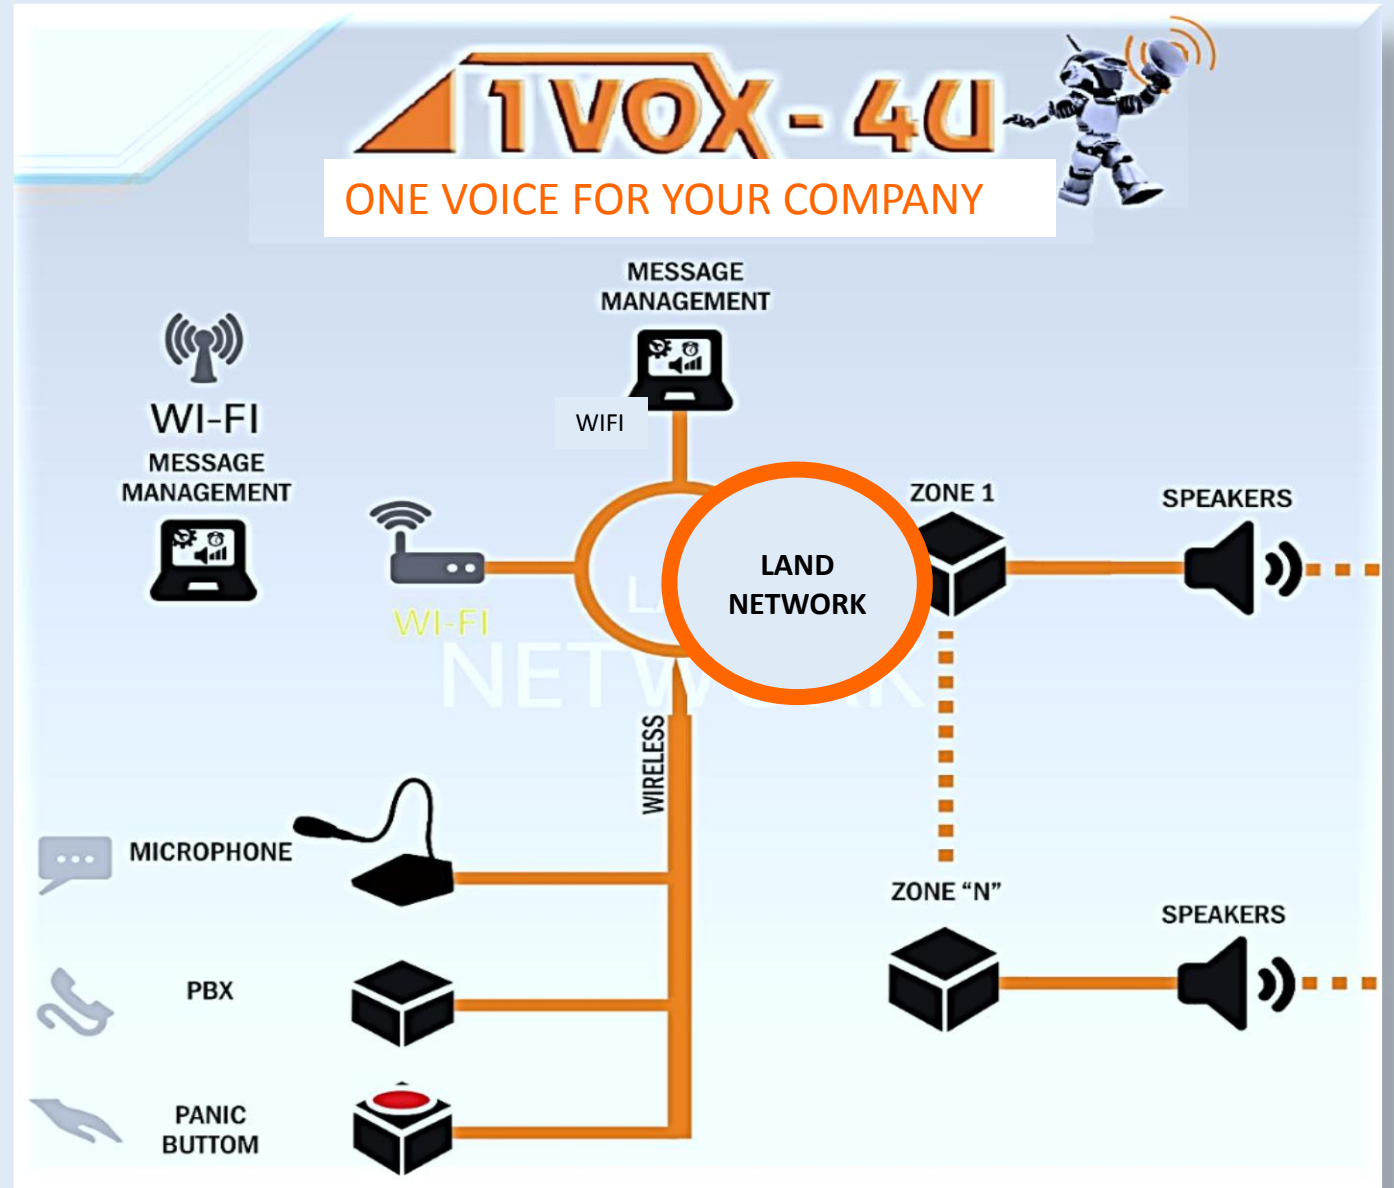

APPLICATIONS

Ticket Offices with large crowds and heavy work: cinemas, parks, museums, transportation terminals, parking lots, hospitals, etc.

IP PUBLIC ADDRESS SYSTEMS

WIRELESS TECHNOLOGY

Conversations Digital Recorder

D.A.R. is a device that complements the implementation of DUALVOX. You can record conversations automatically 7/24 even when the intercom is turned off. Available in 2 models, the **D.A.R. 1/2**, that allows to connect 1 or 2 intercoms, and the **D.A.R. 3/4** that allows the connection of 3 and 4 Intercoms. Both have the ability to receive, process and record conversations running a digital audio processing for higher quality recordings.

ADVANTAGES

- Increased satisfaction for customer and employee.
- Reducing vulnerability to complaints and claims.
- Cost reduction by mistakes and misunderstandings.
- Model for 2 or 4 intercoms.
- Disclosure of successful practices.
- Elimination of poor practices.
